

VRE-TRAK™

VEHICLE RECOVERY EQUIPMENT

SPECIFICATION SHEET

VRE-TRAK-LT (Light Duty)

VRE-TRAK-HD (Heavy Duty)

FEATURES

VRE-TRAK's provide needed traction by insertion under the tires of vehicles stuck in mud, sand or snow! They also nest together for easy storage with built in storage box on top with several mounting options available. VRE-TRAKs are sold in pairs with one included built-in storage box lid and attachment hardware per pair.

Ability to recover vehicles stranded in the worst of conditions. Use VRE-TRAK-LT for vehicle weights up to 5,500 lbs. and VRE-TRAK-HD for vehicle weights of 5,500 - 35,000 lbs+.

VRE-TRAKs can also be linked together end-to-end with Xtreme Zip Ties to create instant roads in adverse off-road conditions. Super Duty Stakes (sold separately) can also be inserted into "+" holes to prevent lateral slippage in muddy conditions.

MATERIAL PROPERTIES

Virtually Unbreakable, Reinforced, UV-Resistant Polymer Resin can handle the heaviest vehicles and provide needed traction for vehicle recovery. Good balance of high-ductility and flexural modulus provide the durability required for years of usage.

DIMENSIONS

OVERALL LENGTH: 42 Inches
OVERALL WIDTH: 14 Inches
OVERALL DEPTH: 3.0 Inches
STACK HEIGHT (2): 4.75 Inches
PART WEIGHT (EACH): 6.9 lbs. (LT)
8.0 lbs. (HD)
